### **Central Form & Data Management**

- Design, publish and fill-in in web browser, PC or mobile apps
- Support multiple web form style, including responsive web, PDF-style & mobile form
- Support unlimited submissions
- Support application-layer encryption & data protection

### Form Builders

Provide on-premises or private cloud deployment

Level UP with

Support 3rd party system integration

**Key Features** 

- Provide file storage and management
- Provide data export
- Provide real-time data integration

### Account Management

- Support user access control
- Support user creation and management
- Support DMS user group definition
- Support password resetting
- Support user group in tree structure

### NEXIFY

### Comprehensive Approach for Management Efficiency

- Enterprise-level security: Secure and help you to fulfill the security requirements for data collection
- Convenient: Access data from anywhere
- Extensible: Allow seamless integration with backend workflow system

### Data Protection

Maximum Security and Control

### Application-Level Encryption

Protect binary files stored on the server with AES-256 encryption provided by NexTore; NexForm can also be integrated with any Key Management System or HSM.

### 前 Form Data

Safeguard your data by encrypting field values before storing them in the database.

#### **Increased Productivity**

Improve mobility by enabling users to access centralized data stores from any location and at any time.

### **Integrated Work Processes**

Integrate with backend workflow system to achieve greater efficiency in data collection.

Record all user and administrator actions with timestamp, target object, actioner ID, action type, and the details of changed fields

## Role-Based Access Control

Implement access control based on user accounts and roles to manage permissions for form design, form submission, form data processing, dashboard access, and more.

### **Paperless**

Minimize expenses by eliminating the need for storing and managing large volumes of paper records.

### **Enhanced Features**

Capture data, pictures, signatures, location information, etc., using a mobile device.
